

Dear Parents,

We believe that you might have already heard about a popular series “Hormones” (telecasted by GMM1) from your children more or less.

This series strongly reflects the reality in today’s society, especially on teenage behaviors. It apparently shows the natural conduct of every adolescent. We suggest that if you can spend time watching this series, it will not only let you understand your children more but also lead you to know the proper way to communicate and give your children good advice. They will also know what is right or wrong in order to live safely in our current situations. This will be very useful especially for parents who have teenage children.

With best wishes
Sararas Ektra School

Remark: You also can watch this series on Youtube.
