Ektra Students Experience Jakarta

BINUS University International Bootcamp

Thirty GAC students from Y.10 & Y.11 recently had the opportunity to experience an international university bootcamp in Jakarta, Indonesia. They had lectures / workshops from some of the resident professors. (below right). They also visited the biggest A.I. company in the country (below left) and learned how some new innovations were produced.

Besides the university & company activities, there was some history at a museum, an Indonesian dance lesson (above left) and everyone got to make some great music using the local Angklung (above right). The students learned how to make Batik using hot wax, and there was plenty of time for shopping and using the swimming pool, basketball court and pool tables at the residence.

The food in Jakarta was excellent. On the left students are getting lunch at the university after a music lesson. The lady on the right was our host for the entire trip, Ms. Gabby. She and her team did an outstanding job of looking after us and showing us around the city. They even gave up their own time to escort the students out in the evening.
